Interests

- AI Integration in Web Applications
- Reporting & Insights Generation
- Data Cleaning and Preprocessing
- Data Visualization and Dashboard Design
- Exploratory Data Analysis (EDA)
- SQL Query Optimization

Certificates

- Project Management – UCI Division of Continuing Education (2024)
- Certifications Database Management System – NPTEL (2022)
- Introduction to Data Science – IBM (2023)
- Python – Sololearn (2024)
- Data Analysis with Python – IBM (2024)

Projects

AcademIQ (AI-Driven LMS)
Technologies: React JS, Tailwind CSS, Node JS, Express JS, PostgreSQL, Cohere AI
11/2025 – 01/2026

- Constructed a role-based Learning Management System with secure authentication and authorization across 3 user modules (Admin, Instructor, Student), while establishing structured approval workflows for 20+ courses and quizzes that boosted content validation efficiency by 30%.
- Integrated Cohere AI (command-a) to auto-generate notes and flashcards, reducing student manual preparation time by 50%.

Traffic Analysis Dashboard and Accident Severity Prediction
Tools Used: Python, SQL, Power BI
06/2024 – 08/2024

- Built interactive Power BI dashboards analyzing 10,000+ transportation records from Tamil Nadu to identify traffic congestion patterns, while optimizing SQL queries to reduce dashboard refresh time by 30%.
- Applied machine learning models (Random Forest, Logistic Regression) to predict accident severity with 85%+ accuracy.

Professional Experience

VWR Avantor
Software Developer Intern
09/2025 – 03/2026 | Coimbatore, Tamil Nadu

- Gained in-depth understanding of enterprise-level application architecture and collaborated with backend teams to integrate APIs, improving monitoring visibility.
- Created and deployed a React JS dashboard tracking 10,000+ daily Notification Engine backend logs in the Self Service production environment.
- Appreciated by manager for delivering a scalable, user-friendly, and performance-optimized interface.

RND Softech Pvt Limited
Data Analyst Intern
06/2024 – 09/2024 | Coimbatore, Tamil Nadu

- Analyzed 20+ existing dashboards to identify data mismatches and reporting inaccuracies, and enhanced data models to improve reporting accuracy by 35%.
- Designed and implemented 5+ interactive dashboards for business performance tracking.
- Recognized by mentors for strong analytical thinking and proactive problem-solving.
